

Permanent antislip treatment

Antislip treatment which creates a controlled and invisible micro-porosity on the treated surface.

Coverage: 1 litre for approx. 8-10 m² depending on the surface and on the desired effect

Strong Points

- Does not change the appearance of the material (tromp-l'oeil effect)
- Leaves the surfaces polished
- Quick and not aggressive
- Not reversible
- Permanent treatment
- Specific for polished and rough porcelain stoneware (gres)
- Certified product

Application

SHAKE BEFORE USING

READY TO USE PRODUCT, DO NOT DILUTE.

ONLY USE WEARING PROTECTIVE GLASSES AND GLOVES.

Clean the surface using CER CLEAN +. If the surface had been previously treated remove the existing treatments.

Apply CER SLIDE on small areas at a time. Apply directly on the surface and spread it out evenly with a brush or cloth with circular motions for 1 or 2 minutes. Allow to act 5 to 10 minutes, depending on the desired anti slip degree. Suck up the product with a water vacuum and rinse out with water and detergent CER CLEAN.

Check if the anti-slip treatment works. If it does not enough, repeat the previous steps.

For the ordinary maintenance of the treated surface we recommend the regular use of CER CLEAN + detergent.

Warnings

Before using the product, read the toxicological data sheet (MSDS) and the label detailing all risks and the personal protective equipment to be used for a correct use. The data of this technical data sheet is based on reliable information. Despite of this, the manufacturer can't know in advance the condition of the materials to be processed and the way of use of the product. Therefore, he disclaims any and all responsibility for damage arising from inadequacy of the product for special applications.

Before treating or cleaning surfaces, carry out a test on an invisible point to prevent possible damages, since our responsibility is limited to the warranty of the purchased product and therefore we disclaim any responsibility for damages resulting from negligence or wrong use.

Packaging and Storage

Keep the original, sealed container in covered, ventilated, dry environment and keep away from heat or low temperatures. After the use keep the package well closed, so the product has a shelf life of approx. 36 months.

Box of 15 x 1 litre bottle – Box of 4 x 5 liter cans
