

SPEEDY

PROFESSIONAL color enhancer with wet effect and rapid /extra-rapid drying. Concentrated, specific for matt surfaces.

Solvent based color enhancing protector with water repellent, oil repellent, antistain and antidirt action for honed or brushed surfaces of marble, granite, agglomerates, sandstone, limestone etc...

Does not turn yellow. Protects surfaces from substances like oil, coffee, grease, dirt, most wines and reduces spray and painting absorption.

Coverage: 1 liter for approx. 10-12 m² depending on the finish of the surface and on its absorption.

Strong points

- Color enhancer
- Rapid / extra-rapid drying
- Antistain
- Antioil
- Water-repellent
- Does not turn yellow
- Antidirt
- Not film forming
- Makes cleaning easier

Application

Shake before using. Ready to use product; do not dilute.

Pour a small amount of **SPEEDY** on a microfiber cloth and spready out evenly with circular motions on a clean and dry surface. Depending on the absorption and on the desired effect apply 2 or 3 consecutive coats. Allow to dry.

It is possible to speed up the drying process using a heat gun starting from the first coat. We recommend to apply small quantities of product in more coats instead of one copious coat. The obtained result is not reversible. After application use a dry cloth or microfiber to even the surface and avoid excesses or residues.

Wait until the surface is dry before walking on. Wait at least 48/72 hours before carrying out staining tests, so to allow the product to dry in the porosity of the surface. For the ordinary maintenance of the treated surface we recommend the regular use of MGP 24 detergent.

Effect / Results

SPEEDY is especially appreciated for its easiness of use, its stain resistance, the deep color enhancing and the rapid drying. Its formulation is specifically studied for enhancing the color of matt surfaces and allow an almost immediate use, owing to the very quick drying and the lack of sticky and difficult to remove residues. For a comparison and demonstration tests with the products you currently use contact us at faq@mpreatment.com and we will be happy to send you the results and a detailed report on the material you wish.

The best stone care solutions...

Useful information

Since our goal is maximum customer satisfaction, we specify the following. The lasting of a protector on interior surfaces is longer than on exterior surfaces which are more subject to UV rays, temperature excursions and records. We also specify that the fact that a protective is defined as stain resistant does not mean that the surface will never get stained, but that it is possible to obtain the best in terms of results and protection when the substance that has accidentally fallen on the surface is removed as soon as possible. Furthermore, to get the best from surfaces of any kind and material, our suggestion is to choose cleaning products that respect both the surfaces and the treatments and carry out correct maintenance cycles. In this regard, we suggest you download the various guides on the use and maintenance of surfaces to extend the life and maintain the beauty of your surfaces over time from the download area of our site.

Warnings

Before using the product, read the toxicological data sheet (MSDS) and the label detailing all risks and the personal protective equipment to be used for a correct use. The data of this technical data sheet is based on reliable information. Despite of this, not knowing either the materials to be treated nor their conditions, the specific characteristics, the processes and finishes they have undergone, the conditions of the treated materials and the way in which the product will be used, we decline any and all responsibility for damage arising from inadequacy of the product for specific and particular applications.

Therefore, before using the product, carry out a test on an invisible area of the surface and only when sure about the success, proceed on a larger area. Our responsibility is limited to the cost of the purchased product and therefore we are not liable for damages resulting from negligence or incorrect or different use of the product, from not following these warnings or by other factors that do not depend on the product itself.

Packaging and storage

Keep the original, sealed container in covered, ventilated, dry environment and keep away from heat or low temperatures. After the use keep the package well closed, so the product has a shelf life of approx. 36 months.

Box of 15 x 1 L bottle. Box of 4 x 5 L cans.

Guarantee

If the customer's request is to have a guarantee on a specific material or project, just send us the request and we will evaluate and, if necessary, adapt the best guarantee to a specific material or specific project, thus also indicating the various conditions that change from situation to situation. We would like to point out that although several products offer generalized guarantees that boast long duration, it is advisable to be wary of generic guarantees that do not consider specific aspects such as: specific materials, conditions and environment where these will be placed and the final use of the environments.
