- **Active concentration** of hydrogen peroxide 1%
- Does not leave residues
- Hygienization and sanitizing
- Universal, suitable for marble, granite, natural stone, gres, ceramic, laminate and glass.

Application

SHAKE BEFORE USING.

READY TO USE PRODUCT. DO NOT DILUTE.

Spray the product directly onto the surface, allow to act for 30/40 seconds and rub with a cloth or paper. No rinsing out is needed.

Can be used with a nebulizer or atomizer for sanitization of the whole place.

Warnings

Before using the product, read the toxicological data sheet (MSDS) and the label detailing all risks and the personal protective equipment to be used for a correct use. The data of this technical data sheet is based on reliable information. Despite of this, the manufacturer can't know in advance the condition of the materials to be processed and the way of use of the product. Therefore, he disclaims any and all responsibility for damage arising from inadequacy of the product for special applications.

Before treating or cleaning surfaces, carry out a test on an invisible point to prevent possible damages, since our responsibility is limited to the warranty of the purchased product and therefore we disclaim any responsibility for damages resulting from negligence or wrong use.

This product hydrogen peroxide; its frequent use on polished marble may cause light loss of shine. Avoid contact with clothing and fabrics.

Packaging and Storage

Keep the original, sealed container in covered, ventilated, dry environment and keep away from heat or low temperatures. After the use keep the package well closed, so the product has a shelf life of approx. 36 months.

Box of 30 x 0.250 L bottles - Box of 15 x 1 litre bottle
